Hi,

This is the account and password to inspection our backlog. It will be more easier for you to check rather than the screen shots.

Please click the direct link below to our board then login with the account and password that we provide.

These may help:
There are 68 User stories, and we give each user story a number to identify it.

In Product backlog, in the end of each log there is a -'number', which is represent the user stories or user story they mapped to.

This sign means 'Task'(As showing at right).

Which every sprint log has a few tasks follow by them.
